Features For Government

Test Step Traceability

SpiraPlan is the only requirements and test management solution on the market with out-of-the-box test-step level traceability and reporting.

Program Management

SpiraPlan offers integrated project and program management capabilities that lets you manage projects, programs, and portfolios.

Security & Privacy

Inflectra's suite of solutions provides powerful security and privacy tools to ensure data is secure, whether you choose to deploy on-premise or in our secure cloud.

Traceability & Compliance

Inflectra's platform gives you end-to-end traceability from the requirements, to test cases, defects, development work items, source code and resources.

Audits & Reporting

SpiraPlan automatically maintains a secure audit-log of all actions in the system, with powerful reports on all activities for regulators and management.

Automated Testing

Rapise helps save time testing systems for compliance. Rapise includes automation tools that generate test scenarios and scripts directly from running applications.

Inflectra: Software Built For You

Easy To Migrate

It's very easy to switch to Inflectra. Migrate legacy data, documents, spreadsheets, and more. We also have many ways to export your data.

Free Trials

No credit cards, no contracts, no hassles. Try all Inflectra products in our secure cloud or on your own servers – all for a generous thirty days.

Service You'll Love

Best practices baked into every product, dozens of integrations, common sense options, first class support every time.
